Carbon Fibre Packings

Disclaimer:

The company's products are sold subject to the company's standard terms and conditions of sale products are warranted against defective materials & workmanship. The company makes every effort to ensure all the information, recommendations or the specifications provided by it are accurate and true. However as the company has no control over the conditions of it's use, it does not accept any liability, either directly or indirectly regarding the usage of its product.

Product Overview:

Description: High-strength carbon fibre packing, known for its excellent thermal conductivity and ability to handle extreme temperatures.

Technical Specifications:

Specification	Test Result
Material:	Carbon Fibre
Temperature Range:	Up to 650°C (non-oxidizing environment)
Pressure Resistance:	Up to 30 Mpa
pH Range:	0-14

Applications:

- Suitable for high-temperature environments such as refineries, petrochemical plants, and power generation.

Key Benefits:

- Excellent thermal conductivity
- High tensile strength
- Resists abrasive media
