

## STYLE 2626 R

**Silica Fibre Packing**

**Disclaimer:**

The company's products are sold subject to the company's standard terms and conditions of sale products are warranted against defective materials & workmanship. The company makes every effort to ensure all the information, recommendations or the specifications provided by it are accurate and true. However as the company has no control over the conditions of it's use, it does not accept any liability, either directly or indirectly regarding the usage of its product.

**Product Overview:**

**Description:** Silica fibre ropes are high-temperature-resistant and non-combustible, making them ideal for extreme heat environments. They are used as insulation and for sealing in furnaces, boilers, and high-temperature piping.

**Technical Specifications:**

Specification	Test Result
Material:	Silica Fibre
Temperature Range:	Up to 1000°C
Pressure Resistance:	Low pressure (non-pressurized sealing).
pH Range:	0-14

**Applications:**

High-temperature industrial applications, such as furnaces and thermal insulation.

**Key Benefits:**

- Excellent heat resistance.
- Non-combustible and durable in thermal cycling.
