Product Overview:

Description: Spiral wound gaskets are composed of alternating layers of metal and filler material, offering exceptional sealing performance under extreme conditions. They are suitable for high-temperature and high-pressure environments.

Technical Specifications:

Specification	Test Result
Material:	Stainless steel, carbon steel, or alloy with graphite or PTFE filler
Temperature Range:	-200°C to 650°C
Pressure Resistance:	Up to 40 Mpa

Applications:

Refineries, chemical plants, and power stations for flange connections.

Key Benefits:

- Excellent seal even with fluctuating temperatures and pressures.
- Suitable for a wide range of industries.
