The company makes every effort to ensure all the information, recommendations or the specifications provided by it are accurate and true. However as the company has no control over the conditions of it's use, it does not accept any liability, either directly or indirectly regarding the usage of its product.

Product Overview:

Description: Specifically designed for heat exchangers, these gaskets are precision-made to handle the unique demands of high-temperature and high-pressure systems. They are custom-engineered to match the exact specifications of your heat exchanger.

Technical Specifications:

Specification	Test Result
Material:	Graphite, PTFE, or reinforced metal composite
Temperature Range:	-100°C to 650°C
Pressure Resistance:	Up to 25 Mpa

Applications:

Heat exchangers in chemical processing, oil and gas, and power generation.

Key Benefits:

- Custom-fit designs.
- Exceptional resistance to thermal expansion.
