### Gasket Insulation Kits ( Type E, Type F, Type D)

#### Disclaimer:

The company's products are sold subject to the company's standard terms and conditions of sale products are warranted against defective materials & workmanship. The company makes every effort to ensure all the information, recommendations or the specifications provided by it are accurate and true. However as the company has no control over the conditions of it's use, it does not accept any liability, either directly or indirectly regarding the usage of its product.

#### Product Overview:

**Description:** Gasket insulation kits are essential for preventing galvanic corrosion between flanges in pipelines. These kits are made from non-conductive materials and provide reliable electrical isolation in cathodic protection systems.

#### Technical Specifications:

Specification	Test Result
Material:	Phenolic, PTFE, or composite insulation material
Temperature Range:	-100°C to 200°C
Pressure Resistance:	Up to 150 Mpa

#### Applications:

Oil and gas pipelines, chemical processing, and offshore installations.

#### Key Benefits:

- Prevents galvanic corrosion.
- High dielectric strength for effective isolation.
